Report of the Auditor General of British Columbia

CONSOLIDATED REVENUE FUND FINANCIAL STATEMENTS

To the Legislative Assembly
of the Province of British Columbia
Parliament Buildings
Victoria, British Columbia

As described in note 1(a), these financial statements reflect only the transactions and balances of the Consolidated Revenue Fund of the Province of British Columbia, which consists of the General Fund and Special Funds. These fund statements serve a specific purpose, in that they are prepared on a basis consistent with the Estimates as approved by the Legislative Assembly, and provide for a comparison between the estimates of revenue and expenditure and the actual operating results of the Consolidated Revenue Fund.

Other significant financial activities of the Province occur outside the Consolidated Revenue Fund. These additional activities are reflected in the Province's Summary Financial Statements, included in Volume I of the Public Accounts, which consolidate organizations, including the Consolidated Revenue Fund, and enterprises for which the government is responsible. Accordingly, to understand and assess the government's management of public financial affairs and resources as a whole, readers should refer to the Province's Summary Financial Statements.

Audit Scope

I have audited the statement of financial position of the *Consolidated Revenue Fund of the Province of British Columbia* as at March 31, 1995 and the statements of revenue and expenditure and changes in cash and temporary investments for the year then ended. These financial statements are the responsibility of the government. My responsibility is to express an opinion on these financial statements based on my audit.

. . . /2

Audit Scope (cont'd)

I conducted my audit in accordance with generally accepted auditing standards. Those standards require that I plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. In the conduct of my audit, I have received all the information and explanations I have required.

Opinion

I report in accordance with section 7 of the *Auditor General Act*. In my opinion, these financial statements present fairly, in all material respects, the financial position of the Consolidated Revenue Fund as at March 31, 1995, and the results of its operations and the changes in its financial position for the year then ended in accordance with the stated accounting policies as set out in note 1 to these financial statements applied on a basis consistent with that of the preceding year.

Statement of Responsibility for the Financial Statements of the Province of British Columbia

Responsibility for the integrity and objectivity of the financial statements of the Province of British Columbia rests with the government. The financial statements are prepared by the Comptroller General under the direction of the Treasury Board, pursuant to section 8(2) of the *Financial Administration Act*, in accordance with the government's stated accounting policies. Each financial statement covers the fiscal year of the government, which is from April 1 to March 31 of the following year.

To fulfill its accounting and reporting responsibilities, the government maintains systems of financial management and internal control which give due consideration to costs, benefits and risks, and which are designed to provide reasonable assurance that transactions are properly authorized by the Legislative Assembly, are executed in accordance with prescribed regulations, are properly recorded so as to maintain accountability of public money and safeguard the assets and properties of the Province of British Columbia under government administration. The Comptroller General of British Columbia maintains the accounts of British Columbia, a centralized record of the government's financial transactions, and obtains additional information as required from ministries, agencies and Crown corporations to meet accounting and reporting requirements.

The Auditor General of British Columbia provides an independent opinion on the financial statements prepared by the government. The duties of the Auditor General in that respect are contained in section 7 of the *Auditor General Act*.

Annually, the financial statements are tabled in the Legislature as part of the Public Accounts, and are referred to the Standing Committee on Public Accounts of the Legislative Assembly. The Standing Committee on Public Accounts reports to the Legislative Assembly on the results of its examination together with any recommendations it may have with respect to the financial statements and accompanying audit opinions.

Approved on behalf of the Government of the Province of British Columbia:

Notes to Consolidated Revenue Fund Financial Statements for the Fiscal Year Ended March 31, 1995

1. Significant Accounting Policies

(a) Reporting Entity

These financial statements include the transactions and balances of the General Fund and Special Funds which combined are known as the Consolidated Revenue Fund. Separate summary financial statements of the government are prepared which include the financial activities of the Consolidated Revenue Fund and government organizations and enterprises. (*See* Summary Financial Statements in volume 1 of the Public Accounts.)

For purposes of these financial statements, the General Fund and Special Funds of the government are presented as one Consolidated Revenue Fund, which is comprised of:

- General Fund—includes all transactions and balances of the government not otherwise earmarked by legislative action, including those of the Queen's Printer and the Purchasing Commission, special accounts and other statutory spending authorities; and
- Special Funds—amounts set aside from the General Fund by special disposition of the Legislature.

(b) Principles of Combination

The accounts of the General Fund are combined with the Special Funds after adjusting them to conform with the accounting policies as described below. Inter–fund revenue and expenditure transactions are eliminated upon combination.

(c) Basis of Accounting and Specific Policies

The government's Consolidated Revenue Fund financial statements are prepared in accordance with the accounting policies described below and on a basis consistent with that of the preceding year.

Basis of Accounting

The accrual basis of accounting is used, which is specifically expressed as follows:

Revenue

All revenues are recorded on an accrual basis except when the accruals cannot be determined with a reasonable degree of certainty or where their estimation is impracticable. The exception is corporate income tax, which is recorded on a cash basis. Revenues from government enterprises are recognized when cash transfers are received or when dividends are declared.

Expenditure

All expenditures, including the cost of fixed assets, are recorded for goods and services received during the year. Grants (which include forgivable loans) are recorded as expenditures when disbursement of the funds has been authorized. Contributions are recorded as expenditures at the earlier of:

(i) the date payment has been authorized; or

(ii) the date on which performance conditions are achieved by the recipient under provisions of a statute, contract or agreement. Authorized contributions relating to retroactive wage settlements are recorded as an expenditure of the period during which the services were provided.

Recoveries of expenditure may be recorded as a credit to the appropriate expenditure account when:

(i) they can be specifically identified with the expenditure transactions and payment has actually been made from an appropriation;

(ii) provision for them has been approved through the Estimates; and

(iii) the expenditure to which they relate was incurred in the same fiscal year.

Tax credits/offsets are accrued on the same basis as the associated tax revenues.

Assets

All assets are recorded to the extent that they represent cash and claims upon outside parties or items held for resale to outside parties as a result of events and transactions prior to the year–end. Rental payments for leases which transfer the benefits and risks incident to the ownership of certain assets, not including special purpose buildings, are reported as expenditures at the dates of inception of the leases.

Liabilities

All liabilities are recorded to the extent that they represent claims payable to outside parties as a result of events and transactions prior to the year–end, including: probable losses on loan guarantees issued by the government; contingent liabilities when it is likely a liability exists and the amount of the liability can be reasonably determined on an individual or portfolio basis; and, unfunded pension liabilities calculated using the Accrued Benefit Actuarial Cost Method. Changes in the unfunded liability for pension plans which arise as a result of estimation adjustments due to experience gains and losses and changes in actuarial assumptions are amortized over expected average remaining service life of the related employee group. Gains or losses arising as a result of plan amendments are recognized in full in the year of amendment.

Foreign Currency Translation

Monetary assets and liabilities denominated in foreign currencies are translated to Canadian dollars at the exchange rate prevailing at the year–end, and foreign currency transactions are translated at the exchange rate prevailing at the date of the transaction unless hedged by forward contracts which specify the rate of exchange. Adjustments to revenue or expenditure transactions arising as a result of foreign currency translation are credited or charged to operations at the time the adjustments arise. Unrealized foreign currency gains and losses on long–term, fixed–term monetary assets and liabilities are reported as deferred charges and amortized over the remaining terms of the related items on a straight line basis. Non–monetary assets and liabilities are translated at historical rates of exchange.

Derivative Financial Instruments

The Province is a party to financial instruments with off–balance sheet risk, either to hedge against the risks associated with fluctuations in foreign currency exchange rates, or to manage risks associated with interest rate fluctuations. Foreign currency contracts are used to convert the liability for foreign currency borrowings and associated costs into Canadian or U.S. dollars. Interest rate contracts are used to vary the amounts and periods, for which interest rates on borrowings are fixed or floating.

Foreign exchange contracts include forward and future contracts, swap agreements and options. Interest rate contracts include forward rate agreements, future contracts, swap agreements and options on swaps, and deferred rate setting agreements.

Off–balance sheet position data is given in the form of notional principal amounts outstanding.

Concessionary Loans and Mortgages

Loans and mortgages that are made at a rate of interest below the government's borrowing rate for an equivalent term are considered concessionary. Concessionary loans and mortgages are recorded at their net present value (net of grant component) less any provision required for doubtful collection. Present value discounts are recorded as grant expenditures. Principal repayments of concessionary loans and mortgages will be applied to the reduced loan or mortgage balance (net present value) and then recorded as revenue (recovery of a grant) when received.

Valuation Allowances

Valuation allowances, such as provisions for doubtful accounts and provisions for reduction in value of investments, are included as expenditures on the statement of revenue and expenditure. Personal income tax, corporate income tax and property tax are recorded net of tax credits and adjustments which are based on revised assessments of actual tax revenue of previous taxation years. Tax credits and adjustments are not considered valuation allowances.

SPECIFIC POLICIES

Cash and Temporary Investments

Cash balances are shown after deducting outstanding cheques issued prior to the year–end. Cheques issued subsequent to the year–end relating to the previous year are included in accounts payable.

Temporary investments include short–term investments recorded at the lower of cost or market value. Temporary investments consist mainly of units in the Province of British Columbia Pooled Investment Portfolio money market funds. Units are carried at the lower of cost of acquisition adjusted by income attributed to the units, or market value.

Accounts Receivable

All amounts receivable (including any trade receivables from government organizations and enterprises) at the year–end for work performed, goods supplied or services rendered are recorded as revenue or recoveries of the fiscal year. Valuation allowances are provided where collectibility is considered doubtful.

Inventories

Inventories comprise items held for resale and are recorded at the lower of cost or net realizable value. Inventories of supplies are charged to the respective programs when the cost is incurred.

Property consists of land which has been purchased, or for which development costs have been incurred and is recorded at the lower of cost or net realizable value, and is held for ultimate resale or lease to outside parties.

Amounts Due From Other Governments

Amounts due from other governments include loans and advances outstanding at the year–end.

Investments In and Amounts Due From Crown Corporations and Agencies

Investments in and amounts due represent long–term investments and amounts due, other than trade receivables, and are recorded at cost unless significant prolonged impairment in value has occurred, in which case they are written down to recognize this loss in value. If, in periods subsequent to recognizing this impairment, the value of the investment is restored, the investment is written up to the lesser of restored value or original cost.

Loans, Advances and Other Investments

Loans, advances and other investments are recorded at cost less adjustment for any prolonged impairment in value.

Mortgages Receivable

Mortgages receivable are secured by real estate and are repayable over periods ranging up to thirty years. Valuation allowances are made where collectability is considered doubtful.

Fiscal Agency Loan Program

Fiscal Agency Loan Program consists of loans made to government bodies, and cash and temporary investments set aside for the specific purpose of loaning to government bodies. Loans are recorded at maturity value less unamortized discounts and sinking fund balances. Discounts are amortized on an effective yield basis.

Only loans made under this program that are recoverable from agencies, and not dependent on future appropriations, are considered financial assets.

Other Assets

Other assets include prepaid program costs. Prepaid program costs represent expenditures made during the fiscal year for work to be performed, goods to be supplied, services to be rendered or contractual obligations to be fulfilled by outside parties in a subsequent fiscal year. These costs also include inventories of operating materials held in the Purchasing Commission and Queen's Printer warehouses pending distribution in a subsequent fiscal year.

Also included in other assets are certain deferred charges.

Physical Assets

Disbursements for physical assets are recorded as expenditures in the year the assets are received. Consistent with the reporting of physical assets as expenditures, highways, bridges, wharves, ferries and ferry landings, buildings, office equipment, furniture, automobiles and Crown land comprised of parks, forests and all other publicly held land by the province, not including property under development, are recorded at a nominal value of $1.

Accounts Payable and Accrued Liabilities

All amounts payable (including any trade payables to government organizations and enterprises) for work performed, goods supplied, services known to have been rendered or for charges incurred in accordance with the terms of a contract are recorded as part of the expenditures of the fiscal year.

Amounts Due to Other Governments

Amounts due to other governments represent liabilities incurred due to advances and loans from other governments.

Due to Crown Corporations, Agencies and Funds

Amounts due to Crown corporations, agencies and funds represent liabilities incurred, other than trade payables, which are payable in the following year.

Deferred Revenue

Deferred revenue represents amounts received or receivable prior to the year–end relating to revenue that will be earned in subsequent fiscal years.

Public Debt

Public debt represents direct debt obligations of the Government of British Columbia, including amounts used for government operating purposes and the Fiscal Agency Loan Program. These obligations are recorded at principal less unamortized discounts and sinking fund balances where applicable.

The Fiscal Agency Loan Program represents debt obligations incurred for the purpose of re–lending to authorized government bodies. The amounts will then be repaid through the operations of the agencies or through amounts advanced to the agencies by the government from future appropriations.

The warehouse program represents debt incurred at beneficial terms to provide for anticipated future needs of government and the Fiscal Agency Loans program. Proceeds are invested until funds are needed. Swaps may be transacted for hedging the debt issued, to ensure that funds are available at prevailing market rates of interest at the time the monies are needed.

The matched book program is designed to take advantage of arbitrage opportunities available in the market where the province may borrow at a given interest rate and invest proceeds at a higher interest rate, subject to profit targets and investment quality parameters. Interest payments and interest income may be swapped to effectively lock in the interest rate spread.

Discounts are amortized on an effective yield basis. Unamortized discount on bonds called and refinanced is amortized over the remaining life of the old debt, or the life of the new debt, whichever is shorter.

Guaranteed Debt

Guaranteed debt represents that debt of municipalities and other local governments, private enterprises and individuals, and debt and minority interests of provincial Crown corporations, which has been explicitly guaranteed or indemnified by the government, under the authority of a statute, as to net principal or redemption provisions. Valuation allowances are made where probable losses can be reasonably estimated.

A valuation allowance provision is established to provide for the probable losses on loan guarantees issued by the government. The amount of the provision is determined by the loss experience of the guarantee program and is sufficient to meet the expected payout of the guarantee to the lender. The provision is recorded as an expense in the year the guarantee is issued and is adjusted as necessary to ensure it equals the expected payout of the guarantee.

Commitments

Commitments represent future obligations of the government for capital contracts and extraordinary program commitments, to the extent of contracts and agreements in place at the year–end.

1995 Change in Accounting Policy and Estimate

During the year, the province changed its accounting policy to record the dedicated taxes collected for British Columbia Transit and BC Transportation Financing Authority and Forest Renewal BC in gross revenues, to be netted off as transfers to these agencies. Revenue payable to Forest Renewal BC for fiscal 1995 was $455 million.

Included in accrued pension liabilities are amounts of $2.5 billion relating to the College Pension Plan, the Municipal Superannuation Plan, and the Teachers' Pension Plan to the extent that those organizations are funded by the government, the effect on the net deficiency is shown in Note 18.

[1]The initial accrued pension liability of $445 million was based on an actuarial valuation of the Public Service Pension Plan for March 31, 1990 plus an estimated amount for Members of the Legislative Assembly Superannuation Account. As a result of a new actuarial valuation of the Public Service Pension Plan done for March 31, 1993, the outstanding liability was estimated at $146 million, a decrease of $299 million. The reduction of estimated liability results from pension fund gains and changes in actuarial assumptions. The reduction in estimated liability is being amortized over the expected average remaining service life of the related employee group (12 years). Expenditures include a recovery of $25 million (1994 : $25 million). The unamortized portion of the reduction in estimated liability as at March 31, 1995 is $249 million (March 31, 1994: $274 million). This liability is obtained from actuarial valuations completed every three years, no interim estimate is prepared.

There is also an amount of $2,487 million relating to the College Pension Plan, the Municipal Superannuation Plan, and the Teachers' Pension Plan.

[2]Includes pending litigation, provision for clean up of Expo land site, provision for guaranteed debt payout and other miscellaneous accrued claims.

19. Physical Assets

Physical assets are recorded as expenditures in the year they are received. Expenditures for physical assets are classified in the books of the province as "Asset Acquisitions." An estimate of the value of the acquired physical assets, along with applicable depreciation, can be found in C12 of the Supplementary Schedules to the Financial Statements section in this Volume.

20. Contingencies and Commitments

(a) Guaranteed Debt

Guaranteed debt as at March 31, 1995 totalled $3,817 million (1994: $4,183 million). *See* Statement of Guaranteed Debt on B30 for details.

(b) Contingent Liabilities

(i) Litigation and Other Claims

The government is a defendant in legal actions and is involved in matters such as expropriation compensation disputes and tax assessment appeals. These matters may give rise to future liabilities.

These potential liabilities are accrued when it is likely that a liability exists and the amount of the liability can be reasonably estimated on an individual or portfolio basis (*see* Note 2—Other accrued estimated liabilities).

The government has contingent liabilities in respect of the following summary of matters where the estimated or known claim is or exceeds $100,000 and is net of accrued amounts:

- claims of $85 million in expropriation disputes;
- claims of $15 million in contract disputes;
- claims of $5 million in construction disputes;
- claims of $5 million regarding negligent design, construction or maintenance of roads;
- claims of $10 million against the Securities Commission;
- claims of $28 million regarding motor vehicle accidents;
- claims of $51 million regarding damages to persons or property and other miscellaneous matters; and
- claims of $12 million regarding tax disputes.

Notes to Consolidated Revenue Fund Financial Statements for the Fiscal Year Ended March 31, 1995—Continued

20. Contingencies and Commitments—Continued

(ii) Other Contingent Liabilities

The government also has contingent liabilities in the form of indemnities, indirect guarantees and outstanding claims. Where indemnities are for explicit quantifiable loans, the amounts are included in the Statement of Guaranteed Debt.

Under the *Criminal Injury Compensation Act*, the government is responsible for providing compensation to victims of crime in British Columbia, for offenses described in the Act. A liability of $72 million (1994: $63 million) has been accrued based on the estimated cost of periodic future payments for claims.

The government operates and indemnifies pre–funded self–insurance programs to cover claims against public school districts and colleges, hospitals and other health care agencies, and certain social service providers. A liability of $28 million (1994: $20 million) has been accrued based on the estimated ultimate cost of settling any outstanding claims.

Under current pension agreements, the government is responsible for payment of pensioners' Medical Services Plan and Extended Health Care premiums, which are recorded when due.

(iii) Aboriginal Land Claims

The absence of treaties relating to most of the territory constituting the Province of British Columbia has resulted in a number of outstanding aboriginal land claims across British Columbia. Some of these claims have resulted in litigation but most have been submitted to governments for negotiation. The province's position on these claims is that, although the province recognizes aboriginal rights including the inherent right of aboriginal people to self–government, the precise location, scope, and content of these rights should be established not through litigation, but by means of tripartite negotiations involving the federal and provincial governments and aboriginal groups. The province anticipates that these negotiations will result in modern day treaties defining the boundaries and nature of aboriginal lands and rights and ensure a more stable environment for resource development in British Columbia.

The British Columbia Treaty Commission monitors the progress of treaty negotiations in British Columbia. Since the Treaty Commission began operations in December, 1993, it has accepted 44 statements of intent to negotiate treaties from First Nations. Two other First Nations, the Champagne and Aishihik First Nations and the Teslin Tlingit have submitted transboundary claims. Four of the 44 First Nations are in the Agreement in Principle stage of negotiations, and 5 in the Framework Agreement stage of negotiations. The remainder are in the preparation stage of negotiations. In addition to these Treaty Commission negotiations, the Nisga'a negotiations in northwestern British Columbia, have come close to an agreement in principle, but are on hold pending resolution of outstanding federal–provincial funding issues.

There is currently one major aboriginal rights case before the courts in British Columbia. It involves a claim by Hereditary Chiefs and the houses they represent to jurisdiction and control over approximately 5.5 million hectares located in mainly rural and wilderness areas of British Columbia. They also seek declarations which challenge the province's ownership and jurisdiction over the lands, mines, minerals, royalties, resources and all other matters within the claim area. They assert that the province's jurisdiction is subject to their right of ownership and further that the province cannot issue licenses or permits authorizing the use of any resources. They also seek damages from the province for wrongful appropriation and the use of the claim area. The claim was dismissed at trial on March 8, 1991. The trial judge held that all land–based aboriginal rights were lawfully extinguished in colonial times (pre–1871). The trial decision was appealed to the British Columbia Court of Appeal which rendered its judgment allowing the appeal in part on June 25, 1993.

The Court of Appeal dismissed the plaintiffs' claims of ownership and jurisdiction, but held that aboriginal rights had not been extinguished as a result of colonial legislation or actions of either the provincial or federal governments before or since 1871 (when British Columbia entered Confederation). The court held that because of the division of powers in the *Constitution Act, 1867*, the province was constitutionally incompetent to extinguish aboriginal rights after 1871, and could only legitimately displace or suspend such rights under section 88 of the *Indian Act (Canada)*, which came into force in 1951. While the Court of Appeal dismissed the plaintiffs' claim for damages because it was based on their assertion of ownership and jurisdiction, the court left open the possibility of other claims for damages or other remedies associated with provincial interference with aboriginal rights, particularly between 1871 and 1951. However, the court also indicated that the validity of Crown grants and resource tenures issued before 1982 (when the then existing aboriginal and treaty rights of aboriginal peoples became constitutionally recognized and affirmed under the *Constitution Act, 1982*) could not now be called into question. Since 1982, any government interference with then existing aboriginal rights must be justified (in accordance with a test previously established by the Supreme Court of Canada) by the government authority so interfering.

Aboriginal rights were not specifically defined by the Court of Appeal other than as activities relating to use and occupation of land that an organized aboriginal society regarded as an integral part of their distinctive culture at the time of the declaration of British sovereignty (1846) over what is now the Province of British Columbia. However, the court did state that aboriginal rights are non–exclusive and are not necessarily incompatible with other types of land use. The court held that the precise scope, content and location of aboriginal rights and the reconciliation of those rights with other uses of lands and resources were left to be determined in trial proceedings properly framed to deal with those issues. However, the court also indicated throughout the judgment that those issues were "ripe for negotiation" and encouraged the parties to negotiate their differences.

Leave to appeal this case was granted by the Supreme Court of Canada on March 25, 1994. However, pursuant to an agreement between the parties made on June 13, 1994 an adjournment of the proceedings in the Supreme Court of Canada was obtained to allow the parties time to attempt to resolve the issues raised in this case by negotiation.

20. Contingencies and Commitments—Continued

Seven other cases involving aboriginal rights issues were also recently decided by the Court of Appeal. These cases can be categorized as follows:

- hunting cases wherein an aboriginal right to hunt for sustenance and ceremonial purposes was held to exist and consequently certain provincial statutory provisions were held to be inoperative in their application to aboriginal peoples;
- commercial fishing cases wherein the aboriginal right to fish for sustenance and ceremonial purposes was held not to extend to commercial fishing; and
- fishing cases wherein the right of native bands to establish bylaws with respect to reserve lands was held not to extend to regulation of fishing on rivers running through reserves.

Those cases, with the exception of the hunting case, are also on appeal to the Supreme Court of Canada.

(c) Commitments

The government has ongoing operational commitments to fund a variety of programs for public welfare including health, education, social services, protection of persons and properties, and management of natural resources. In addition, the government normally contracts out construction or maintenance of its roads, bridges and buildings. All these ongoing operational commitments are detailed in the Estimates published yearly and are not repeated in this note. Any significant non–operating commitments (less than five years duration costing more than $50 million) and their completion costs would be detailed in this note. No significant non–operating commitments existed as at March 31, 1995.

[1] *See* the Trust Funds Financial Statements section of the Public Accounts for the latest audited financial statements of superannuation and pension funds, the Workers' Compensation Board and most entities whose sinking funds are administered by the Provincial Treasury.

[2] The amounts for six of the superannuation and pension funds totalling $13.9 billion (1994: $13.8 billion) and for the Workers' Compensation Board of British Columbia, have been taken from these funds' latest audited financial statements which have a different fiscal year–end than these financial statements.

[3] Defeased Trust Funds of $997 million (1994: $992 million) represent investments set aside to repay outstanding term debts with a par value of $955 million (1994: $989 million) and related interest payments. Accrued interest payable on term debts at March 31, 1995 totals $25 million (1994: $23 million). These defeased debts have been removed from the balance sheet of government organizations and enterprises and are considered extinguished for financial reporting purposes.

[4] Some balances from the previous year have been restated to reflect the changed presentation or more current information.

25. Comparatives

Certain of the comparative figures for the previous year have been reclassified and adjusted to conform with the current year's presentation.

A correction of reported taxation revenues through an improved estimating process resulted in a net change of $5 million for Insurance Premium Tax.

Otherwise, the reclassifications had no effect on the operating results or fund balances as previously reported, except as stated in Note 18.

Personal and corporation income tax revenues are recorded after adjustment for tax credits. Personal income tax was reduced by $69 million (1994: $34 million) and corporation income tax increased by $21 million (1994: decreased by $1 million). The types of tax credits adjusting personal and corporation income tax revenues are for foreign taxes, logging taxes, venture capital, political contributions, low income rent reductions, low income tax rebates and royalty tax rebates. Additional corporate and personal income tax refunds are issued under the *International Financial Business (Tax Refund) Act*. Corporate income tax refunds were $3.4 million (1994: $0.9 million) and personal income tax refunds were $0.4 million (1994: $0.3 million).

Property—residential (school purpose) revenue is net of home owner grants of $417 million (1994: $405 million).

Amounts payable in foreign currency are translated into Canadian dollars at the rate of exchange prevailing at the fiscal year–end.

[3]As a result of government financing and investment policies, $858 million (1994: $1,052 million) of guaranteed debt is held by trust funds actively managed by the government.

[4]The government is directly responsible for paying 59.92% to 100.00% of debt service costs for health and education debt through various grant formulas. In 1994/95, the contributions totalled approximately $442 million (1994: $559 million) or 83.05% (1994: 86.27 %) of debt service costs.

[5]The British Columbia Second Mortgage Program was sold to the Bank of Montreal in June 1989, with the condition that the province will buy back any mortgages that may become uncollectible in future years.

[6]The government has unconditionally guaranteed the payment of principal and interest for $3,242 million (1994: $3,431 million) of debentures issued to the Canada Pension Plan Investment Fund. Debentures totalling $2,490 million (1994: $2,817 million) are included in net guaranteed debt and $752 million (1994: $614 million) have been defeased and are considered extinguished for financial reporting purposes.

Total Financing Transactions	**744,314,612**	**795,379,147**	**(51,064,535)**

[1]The purpose of this table is to show the receipts and disbursements for major financing transactions related to ministry programs, or administered by ministries, in order to fully disclose the government's financial transactions and provide documentation for the *Supply Act* which authorizes these transactions. Financing transactions do not affect operating revenue or expenditure or change the net equity of the province. The exception would be concessionary loans. Concessionary loans are those granted at an interest rate less than market rate. The present value of the difference is considered as a grant and an expense of the period. They do, however, change the composition of the province's assets between cash and loans and other investments. As a result, they either increase or decrease the government's cash or borrowing requirements.

[2]Receipts represent only the recovery of the original advance, investment or loan principal (disbursements). Interest earned on outstanding advances, investments or loans is credited to the appropriate Special Account or to the main operating account revenue.
